*Overview of Automated External Defibrillator (AED) Program*

*for Orange Unified Schools*

---

The Orange Unified Schools District maintains a total of 71 AED units District-wide. The number of AEDs at every school site and district facility range from one to five. Thus, OUSD's AED program is one of the largest in the county.

Per AED regulations for K-12 schools, all staff at every site receive an annual, in-person orientation that describes sudden cardiac arrest, the school's emergency response plan, and the proper use of the approved AED unit via a demonstration. In addition, site-specific handouts that illustrate the site map and identifies the location of each AED, step by step instructions relative to the use of the AED, and information about who they can contact if they want to voluntarily take AED/CPR Training is distributed to staff.

If you would like additional information, please do not hesitate to contact Risk Management at 714-628-5390.
